

CABI Microbial Services Prices from 1 January 2009

Identification	Price (excl VAT)
Isolation from a contaminated sample and identification to species level of predominant mould	£325
Identification of each additional organism to species level	£165
Morphological identification of a single pure culture of a mould	£165
Molecular identification of a single pure culture of a mould, yeast or bacterium [normal rate]	£195
Molecular identification of a single pure culture of a mould, yeast or bacterium [priority service]	£295
Molecular identification plus morphological identification of a mould or physiological identification of a yeast [normal rate]	£290
Molecular identification plus morphological identification of a mould or physiological identification of a yeast [priority service]	£395
Molecular characterisation	
Molecular fingerprinting of a mould, yeast or bacterium	From £195
Molecular sequencing plus fingerprinting of a mould, yeast or bacterium	From £310
Supply	
Freeze dried culture	£145
Active culture on agar	£170
Genomic DNA	£350
Culture extract	£225
Testing	
Site consultancy UKAS accredited	From £3,850
Testing to BS EN60068/MIL STD 810 UKAS accredited	From £3,580
Fuel testing UKAS accredited	£240
Challenge testing	On request
Other testing prices on request, dependent on requirements	
Preservation and patenting	
Safe Deposit 'Gold' option: Molecular strain definition of stored strains including comparison against type strains and biannual viability check	£540 + yearly charge
Safe Deposit standard option: Preservation and one year safe deposit	£220
Annual safe deposit charge	£100
Biannual viability check	£50 per strain
Freeze drying of a microorganism	£165
Patent deposit	From £650
Genetic integrity after storage	From £540

- Listed prices are for single samples. Bulk orders are available on request
- Excludes postage & packing. (Quoted on an individual basis)
- VAT will be charged where applicable
